

Master Syllabus

CAT 2431 - OSHA Construction Standards

Division: Science, Mathematics and Engineering

Department: Civil Architectural Technology

Credit Hour Total: 2.0

Lecture Hrs: 2.0

Date Revised: October 2013

Course Description:

Rules, interpretations, record keeping and standards required by Occupational Safety & Health Administration (OSHA) (29CFR Part 1926) for the construction industry to ensure employees a safe, healthful workplace. Successful completion of the course provides the 30 hour OSHA Construction Safety Card.

General Education Outcomes:

- Critical Thinking/Problem Solving

Course Outcomes:

Federal safety requirements

Describe the federal safety requirements.

Assessment Method: Standardized national examinations

Performance Criteria: 70% or better on exam

Terminology

Define and use correctly the terms used in OSHA (29CFR Part 1926).

Assessment Method: Standardized national examinations

Performance Criteria: 70% or better on exam

Personal protective equipment

Describe the circumstances when approved personal protective equipment must be worn and the appropriate personal protective equipment for the given circumstance.

Assessment Method: Standardized national examinations

Performance Criteria: 70% or better on exam

General safety and health provisions

Identify the general safety and health provisions required during construction.

Assessment Method: Standardized national examinations

Performance Criteria: 70% or better on exam

Occupational health and environmental controls

Describe required occupational health and environmental controls.

Assessment Method: Standardized national examinations

Performance Criteria: 70% or better on exam

Asbestos control techniques

Describe the methods of asbestos control techniques for removal, renovation, and demolition.

Assessment Method: Standardized national examinations

Performance Criteria: 70% or better on exam

Maintenance of personal protective equipment

Demonstrate the use and maintenance of personal protective equipment.

Assessment Method: Standardized national examinations

Performance Criteria: 70% or better on exam

General fire protection program

Indicate what must be included in a general fire protection program.

Assessment Method: Standardized national examinations

Performance Criteria: 70% or better on exam

Outline:

Introduction and general interpretations
General safety and health provisions
Occupational health and environmental controls
Personal protective equipment
Fire protection and prevention
Hazard communications (HAZCOM)
Signs, signals and barricades
Material handling
Storage, use and disposal of tools (hand and power)
