WOMEN IN SCIENCE, TECHNOLOGY, ENGINEERING & MATHEMATICS

Are you interested in pursuing a degree or a career in science, technology, engineering or mathematics (STEM)? Would you like to learn more about jobs in these fields?

The Women in Science, Technology, Engineering, and Mathematics (WiSTEM) Institute is an amazing opportunity to learn about STEM fields. WiSTEM is open to girls who are entering grades 10, 11, and 12. Each day you will participate in “hands-on” lab sessions in which you will build, experiment, and discover more about each of these exciting fields.
